My mother and her sister were/are going through an ugly dispute over how my grandmother's estate has been handled. One sister seems more concerned about preserving \$ for her family rather than my grandmother's care since she's still alive (and it's not my mother). Had the estate been set up properly (and not by my aunt's husband), maybe their relationship wouldn't be irreparably damaged. I assumed my parents had a trust. Then one day I casually asked about it even though I read this book a few years ago and knew I should've addressed it earlier. To my surprise they only had a will. My intelligent, stubborn and know-it-all father said he wanted easy access to his money and a trust wouldn't work. Well, all my inexpert advice wouldn't sway him. I sent the book to my parents and after they both read it, an appointment was set up with their attorney to get things set up properly. If a book can convince my father, then it must be superb. Personally I don't care about what I can get when they pass away. I just figure if someone's going to set up a will to supposedly make things easier on their heirs, they might as well create a trust and really make things less of a hassle. Any book that can convince my father gets 5 stars.

Good for anyone who has anything. Not a hard core push to spend unneeded money. Let's you know what you can do yourself and what to use a pro for.

super product, love them!!

Thank You!
