From the valiant death of Ferdinand Magellan in the azure surf of Mactan in 1521 to the fall of Ferdinand Marcos at the hands of Cory Aquino and a disillusioned Reagan administration in 1986, Stanley Karnow, the venerable Asian correspondent for the Washington Post, traces the arc of the Philippines' long, tumultuous relationship with the West. Briskly-paced and engaging, "In Our Image" won the 1990 Pulitzer-prize for history and presents a balanced, yet sobering perspective on America's only traditional colonial experience. Those looking for anti-American or anti-imperialist fodder will be sorely disappointed by Karnow's generally positive assessment of US policies in the archipelago. He praises the massive investment made in developing and improving the indigenous education system and industrial infrastructure, and frequently notes that American policies were far less exploitative and more politically liberal than any other colonial administration in history. Indeed, he argues that the Washington's voluntary grant of independence to the Philippines was nothing short of revolutionary at the time, and that the islands were actually more subject to American domination after independence in 1946 than before. On the other hand, those seeking inspiration in how American democracy and industry can be successfully exported to different cultures will be

equally disappointed with this case study. Most politicians today, liberal and conservative alike, bristle at the notion that some people or cultures are simply incapable of American-style democracy, and the freedom and justice that comes with it.
