I would like to recommend a great method that I use with this 'picture puzzle' books. I bought a piece of clear plastic, I cut it a little bigger than the size of the page, I folded it and I kind of insert it over the page, so that it covers the picture entirely. And with one of those white board markers, I mark the differences I find. And also I draw a little dot on the margin, in order to keep track of how many differences I find. When I finish finding them all, I simply erase the marks with a dry paper napkin, and I place the plastic on the next page! Neat! That way I don't ruin the surprise if someone else uses this book after me.

I bought this book for my husband as he is a nut for baseball and he needs challenges to keep his brain stimulated. His doctor recommended puzzles as he has had some brain injuries due to car crashes and as we age it is apparent we do not always remember the things we used to know and my husband is even worse and it frustrates him. The MD suggested that puzzles may open the channels by stimulating his knowledge as he has a master degree and he wants to be active and loves to socialize and talk to others- esp about sports. This book is like DELL Puzzles as it shows EASY to HARD puzzles. However, it seems they are more Hard than Easy overall. I love logic puzzles and I tried an Easy puzzle and it was Hard to me as I got stumped and had to ask for help. I hate sports overall but I was raised on Baseball and Trivia abt baseball - the only sport besides bowling I actually understand! This book will last you for a long long long time and will entertain the whole family as you will need their input. you can make a whole family evening just doing baseball stats and trivia. What a novel idea spending time together!!!

I purchased a number of these books for my daughter who is now deceased. She greatly enjoyed doing these puzzles and they provided hours of entertainment for her. Sometimes we shared the puzzles while waiting in numerous doctor's offices. I kept a couple of them and put them away in a memory box after her death.

I usually love these books, but this one had many errors on them. Some of the answers in the back did not correlate to the picture changes and some of the pictures that had changes were not listed in the answers. The puzzles are always fun, but the editing on this one was very poor.

I purchased this for my husband for Christmas - and he is truly THE most difficult person to shop for. But he LOVES baseball and I've caught him working on my crossword puzzles from time to time! So I thought this would be just right - and it was. He loves it! Used to be he'd be zoning out in front of the TV before bed, now he sits in bed with his puzzle book - much better for his brain!

My 8 year old nephew loves these things and I was happy to find him a spiral bound, huge book of pictures. The book is very good quality and kept him entertained for a good part of their trip home to Colorado after the holidays. The fact that he is an 8 year old should not deter an adult from purchasing this book. The searches are not any easier than the bar game search and find. It just takes him a little bit longer, but there were times where he found the differences faster than I did!

I really enjoyed doing the puzzles, hours of fun and helps keep the mind sharp. The reason I gave it 4 stars instead of 5 is that a lot of the answers in the back were wrong or mixed up. One said the waves were washed away and there were no waves in the photo. One said it had 10 changes but only 9 answers. They'd described changes - for example - change #1 was describing where they were showing change #5. Things like that. But overall a fun book of puzzles. Personally I need a lot of light on the book as some of the changes are so SMALL.

Book is exactly as described. My son loves all the different types of puzzles included. The book is enjoyable for all ages.
