Synopsis

The early history of South Africa from 1486 to 1897. How many of us in the USA or Europe know much about the history of this very interesting area of the world? During the times of the American and French Revolutions, England, Holland, (The Dutch East India Company) and France were involved with colonizing and using South Africa for their own purposes. While the US West was being opened, and the Indian tribes were being decimated, South Africa was dealing with various uprisings, including that of the Zulu, under TShaka. 1867 saw the discovery of Diamonds in South Africa. Written in 1897, this classic retains the unvarnished stories that can get lost over the years that pass. This edition of the 1897 (Vol. 38 of *The Story of Nations*) original retains the original spellings, and the flavor of this special early book. It has been carefully edited for scanning and spelling errors. Illustrated. [EDB Pubs]

Customer Reviews

This book is a classic on South African history that every historian has quoted over the years. I don't think South African history would be the same without it. I'm therefore thrilled to see it being published in digital format, as it contains a mound of useful data usually skipped over by newer and shorter historical works today. Welcome back George M'Call Theal!
