The œFive Civilized Tribes• are among the best known Native American groups in American history, and they were even celebrated by contemporary Americans for their abilities to adapt to white culture. But tragically, they are also well known tribes due to the trials and tribulations they suffered by being forcibly moved west along the œTrail of Tears•. Though the Trail of Tears applied to several different tribes, it is most commonly associated today with the Cherokee. The Cherokee began the process of assimilation into European America very early, even before the establishment of the United States, but it is unclear what benefits that brought the tribe. Throughout the colonial period and after the American Revolution, the Cherokee struggled to satisfy the whims and desires of American government officials and settlers, often suffering injustices after complying with their desires. Nevertheless, the Cherokee continued to endure, and after being pushed west, they rose from humble origins as refugees new to the southeastern United States to build themselves back up into a powerhouse both economically and militarily. The Cherokee ultimately became the first people of non-European descent to become U.S. citizens en masse, and today the Cherokee Nation is the largest federally recognized tribe in the United States, boasting over 300,000 members. The Creek became known as one of the Five Civilized Tribes for quickly assimilating aspects of European culture, but in response to early European contact, the Muscogee established one of the strongest confederacies in the region. Despite becoming a dominant regional force, however, infighting brought about civil war in the early 19th century, and they were quickly wrapped up in the War of 1812 as well. By the end of that fighting, the Creek were compelled to cede millions of acres of land to the expanding United States, ushering in a new era that found the Creek occupying only a small strip of Alabama by the 1830s. With the Spanish Empire foundering during the mid-19th century, the young United States sought to take possession of Florida. President Andrew Jackson’s notorious policy of Indian Removal led to the Seminole Wars in the 1830s, and that was already after General Andrew Jackson had led American soldiers against the Seminole in the First Seminole War a generation earlier. The Seminole Wars ultimately pushed much of the tribe into Oklahoma, and the nature of some of the fighting remains one of the best known aspects of Seminole history among Americans. The Trail of Tears comprehensively covers the history and legacy of the events that brought about the removal of the Southeastern tribes. Along with pictures of important people, places, and events,

you will learn about the Trail of Tears like you never have before, in no time at all.

This is another sad story about the plight of First Americans and their forced move from the Southern States to Indian Territory Okolona by General Winfield Scott with blessings from President Andrew Jackson. Indian men were arrested and driven into stockades; Women were dragged from their homes into stockades with the sky for blanket. The old were prodded with bayonets to hasten them into stockades over four thousand Cherokeeâ€™s Choctawâ€™s and Creekâ€™s lost their lives in this forced evacuation, no wonder it is called âœ•The Trail of Tearsâœ• experienced by the Cherokee, Creeks, Choctaw who were forced to leave their ancestral homes and most of their possessions over eight thousand lost their lives but it was better than the genocide practiced by some soldiers and whites in the Plains and West. The forced removal from their original land is repeated time and time again by our government as soon as whites found riches or good land the Indians lost When Gold was found on Cherokee land Georgia passed laws restricting Cherokee rights to the land and authorized forced removal of them from their land. The Cherokees fought back by appealing to the president Andrew Jackson and Congress and sought an injunction to halt the

repressive Georgia laws. The case was heard by the Supreme Court who was sympathetic to the Cherokee's problem. The court flip-flopped first refusing to hear the injunction then ruled that the Cherokee nation was a separate political entity the court overturned Georgia law on the basis that states were not authorized to negotiate the terms of use of Native American Lands. Both the state of Georgia and President Andrew Jackson ignored the ruling Jackson's quotes John Marshall has made his decision now let him enforce it.
